2. Competence

In the Republic of Austria decisions on the admission to studies, the recognition of examinations, and the recognition of final diplomas (validation) are taken by the organs of the universities, the University of Applied Sciences Council, the universities of applied sciences, respectively.

In the Slovak Republic decisions on the academic recognition of educational qualifications which are issued by foreign higher education institutions (validation), are taken by those higher education institutions at which the same or a similar field of studies has been established. In case that such a higher education institution does not exist in the Slovak Republic, the decision is taken by the Ministry of Education. Foreign qualifications which give access to higher education are subject to validation. Decisions in this case are taken by the district authorities. Certificates or higher education diplomas which are issued in a country with which the Slovak Republic has concluded a bilateral agreement on the mutual recognition of the equivalence of educational qualifications, are not subject to validation.

3. Higher education institutions

The following institutions form part of higher education:

	Republic of Austria	Slovak Republic
University higher education sector	Universitäten	univerzitné vysoké školy

Non-university higher education sector	Fachhochschul-Studiengänge or Fachhochschulen (FH), respectively	neuniverzitné vysoké školy or odborné vysoké školy, respectively

Doktoratsstudium (2)		doktorandské štúdium (3)	doktorské štúdium (6)

5. Recognition of qualifications giving access to higher education

An Austrian secondary school leaving certificate (Reifezeugnis) and a secondary school leaving certificate issued in the Slovak Republic (Vysvedčenie o maturitnej skúške) are mutually recognized as equivalent educational qualifications for the purpose of access to all kinds of higher education programmes.

An Austrian university entrance qualification certificate (Studienberechtigungszeugnis) can be recognized in the Slovak Republic as a title for the access to the relevant field of study.

The direct admission depends in both countries for some fields of study on the fulfilment of specific requirements (in the Republic of Austria: supplementary examinations, in the Slovak Republic: entrance examinations).

Applicants of the relevant other country have, as a rule, to prove the knowledge of the relevant language of teaching (German or Slovak, respectively).

6. Recognition of examinations

The recognition of examinations should take place on the basis of a case-by-case decision taken by the competent authority, due to the existing equivalence.

7. Recognition of higher education qualifications

The following correspondences of final diplomas are recommended:

	Republic of Austria		Slovak Republic	
	trinary system of studies	binary system of studies	trinary system of studies	binary system of studies
1st level	Bakkalaureus (Bakk.) Bakkalaureus (FH) (Bakk. (FH))	---	bakalár (Bc.)	---

	Doktor (Dr.)		philosophiae doctor (PhD.) artis doctor (ArtD.)	

Besides, in the Republic of Austria there exist Master degrees (MAS, MBA) on the 3rd level which do not have a correspondence in the Slovak Republic.

The recognition can either give all effects which result from the respective diploma of the country in which recognition takes place (validation), if the validation is a necessary prerequisite for the professional activity which the applicant intends to exercise, or give only access to further studies. In all cases the competent authorities decide on the subject-oriented prerequisites for the recognition.

The use of all academic degrees in the respective other country should be possible in the original version.

The Austrian and the Slovak habilitation can be valued as mutually equivalent academic qualifications.
