In the Republic of Azerbaijan decisions on the academic recognition of educational qualifications which are issued by foreign higher education institutions (validation), are taken by the Azerbaijani Ministry of Education.

## 5. Recognition of qualifications giving access to higher education

An Austrian university entrance qualification certificate (Studienberechtigungszeugnis) can be recognized in the Republic of Azerbaijan as a title for the access to the relevant field of study.

The direct admission depends in both countries for some fields of study on the fulfilment of specific requirements (in the Republic of Austria: supplementary examinations, in the Republic of Azerbaijan: imtahan verməklə müsabiqə yolu ilə).

Applicants of the relevant other country have, as a rule, to prove the knowledge of the relevant language of teaching (German or, respectively, Azerbaijani, possibly Russian).

## 6. Recognition of examinations

The recognition of examinations should take place on the basis of a case-by-case decision taken by the competent authority, due to the existing equivalence.

## 7. Recognition of higher education qualifications

The following correspondences of final diplomas are recommended:

The recognition can either give all effects which result from the respective diploma of the country in which recognition takes place (validation), if the validation is a necessary prerequisite for the professional activity which the applicant intends to exercise, or give only access to further studies. In all cases the competent authorities decide on the subject-oriented prerequisites for the recognition.

The use of all academic degrees in the respective other country should be possible in the original version. The entry in public documents ist is not possible in Austria.
